

New Providence Internal Medicine Associates

Welcome to our Practice!

About our practice

We have been providing excellent care in New Providence since 1981. It is our philosophy that to provide excellent care, we and our patients must work together to diagnose, treat, and prevent illness in the way that works best for each individual patient.

What is an Internist?

Doctors of internal medicine focus on adult medicine and have had special study and training focusing on the prevention and treatment of adult diseases. At least three of their seven or more years of medical school and postgraduate training are dedicated to learning how to prevent, diagnose, and treat diseases that affect adults.

Our Doctors
